

AS 5 NEXT BC Lithium

Vertical dry vacuum cleaners with batteries

Dry vacuum cleaner where compactness and high performance combine to create a new battery-powered model even more efficient and functional than its renowned predecessors. The motor head, designed to ensure maximum quietness, houses the powerful brushless motor, which delivers high cleaning performance. The ergonomic, durable handle, practical accessory holders, the protective bumper, and the trolley with front swivel and fixed rear wheels make the AS 5 NEXT BC Lithium highly manoeuvrable and comfortable to use. To make the machine even more functional, a dual hose coupling system has been designed to ensure a secure fit during operation. Furthermore, the release mechanism on the suction inlet allows the hose to be easily detached with one hand. The vacuum cleaner features two different suction power settings to suit every need: Eco mode, designed to reduce energy consumption without compromising cleaning effectiveness, and Boost mode, ideal for tackling the most stubborn dirt. The AS 5 NEXT BC Lithium is powered by CAS (Cordless Alliance System) batteries, offering versatility, reliability and high-level performance: up to 50 minutes of runtime and fast charging in just over an hour.
