

## Vertical dry vacuum cleaners

Dry vacuum cleaner where compactness and high performance combine to create a machine even more efficient and functional than its renowned predecessors. The motor head is designed to ensure maximum quietness and houses the powerful motor that guarantees high cleaning performance. The ergonomic, durable handle, practical accessory holders, the protective bumper, the trolley with front swivel wheels and fixed rear wheels, and the 10-metre cable make the AS 5 NEXT highly manoeuvrable and extremely comfortable to use. To make the machine even more practical, a dual hose coupling system has been designed to ensure a secure fit during operation. Furthermore, the release mechanism on the suction inlet allows the hose to be easily detached with one hand. Available in the FT version, with a textile filter (polyester), and the FC version, with a standard cartridge filter, to ensure the best filtration performance.
