

GPW 120.9 SP C

Cold water pressure washer - single-phase

GPW 120.9 SP C is a semi-professional cold water high pressure washer that boasts top-level efficiency and performance, thanks to an operating pressure of 120 bar and a water flow rate of 9 l/min. The robust frame and stainless steel casing make the machine solid and resistant, while the TS (Total Stop) system stops the motor and immediately cuts off the water flow when the trigger on the spray gun is released, ensuring safety, reliability, and energy savings. Small, compact and easy to use, the GPW 120.9 SP C is extremely light and manoeuvrable thanks to its practical handle and large rear wheels, which allow the operator to move the machine quickly and easily. The GPW 120.9 SP C is perfect for both daily cleaning of floors, walls, building facades and outdoor areas, as well as for private use in domestic environments.
