

GPW 120.9 SP H

Hot water pressure washer - single-phase

GPW 120.9 SP H is a professional hot water high pressure washer that delivers excellent cleaning results thanks to an operating pressure of 120 bar and a water flow rate of 9 l/min. The machine is equipped with a 3-ceramic piston pump with a connecting rod/crank system and brass pump head, allowing for easy adjustment of the delivery pressure and detergent suction. It features a vertical diesel-powered boiler to heat the outgoing water, and the practical control panel includes a thermostat to select the desired temperature. Extremely robust and durable thanks to its stainless steel frame and casing, this machine is equipped with the TDTS (Time Delayed Total Stop) system, which stops the motor 12 seconds after the trigger on the spray gun is released. The GPW 120.9 SP H is the ideal solution for cleaning heavily soiled or greasy industrial surfaces and for removing stubborn dirt, such as grease and oil residues that can accumulate on vehicle chassis and engines.
