

GPW 150.15 TP C

Cold water pressure washer - three-phase

GPW 150.15 TP C is a professional three-phase cold water high pressure washer which, thanks to its considerable water flow rate and power, is capable of tackling the most demanding cleaning tasks with impeccable results, removing even the most stubborn dirt and minimising operator effort. Extremely robust thanks to the resistant frame and stainless steel casing, the machine is equipped with a professional 3-ceramic piston pump with a connecting rod/crank system and brass pump head, which allows for easy adjustment of the delivery pressure and detergent suction. The STS (Smart Total Stop) system stops the motor 12 seconds after the trigger on the gun is released, signals micro-leaks or water shortage, and turns off the machine after approximately one hour of standby, making the GPW 150.15 TP C an extremely safe machine.
