

GREEN PRO POWER WD 80.2 P

Wet & Dry vacuum cleaners

Wet/dry vacuum cleaner made of regenerated plastic material. High-efficiency model equipped with two new-generation motors (individually controllable) and the innovative UFS (Ultra FilteRing System) filtering system, which, thanks to the special polypropylene spacer ring, allows the cartridge filter (class M) to remain installed at all times, ensuring optimal suction performances and maximum protection for the motor (even in case of incorrect use by the operator). UFS is also practical: cleaning and maintenance of the floating system, which is independent from the motor head and attached directly to the ring, is immediate, simple and intuitive. Small size and weight, premium performance. Exhaust air filter. Nylon, HEPA cartridge, TNT and paper bag filters optional.
