

GREEN PRO REXA 50 D 55 BC CHEM

Walk behind scrubber dryers REXA 50 SERIES - with TRACTION

GREEN PRO REXA 50 D 55 BC CHEM is the new walk-behind scrubber-dryer designed by Ghibli also in an eco-friendly version. Its 50 litre capacity, 530 mm washing track, 750 mm suction width and 2650 m²/h productivity make it ideal for use in medium-sized areas, guaranteeing fast and effective results even in the most complex environments to clean. The machine's numerous functions such as Silent Mode, ECO System, and Brush Release, for automatic brush release, can be operated easily and intuitively via the practical control panel with integrated display. The ergonomic handle with Touch System gives the operator maximum flexibility and control while working. The LED front light allows the machine to be used even in poorly lit environments. A perfect mix of sustainability, efficiency and power, the Green Pro REXa 50, although produced using regenerated plastic material, offers the same robustness and reliability that have always distinguished Ghibli machines.
