designed by **GHIBLI**

**GREEN PRO: A BRAND NEW RANGE OF MACHINES  
MADE WITH RECYCLED PLASTIC!  
A SELECTION OF SUSTAINABLE PRODUCTS CHARACTERIZED BY  
THE SAME QUALITY AND RELIABILITY OF THE STANDARD MODELS.**

**GoinGreen**  
Sharing Our Sustainable Vision

# COMMITMENT TO THE ENVIRONMENT

Attention to environmental protection and pollution reduction is an issue of global concern. The Planet's resources are not unlimited, so they must be conserved carefully, without waste, respecting ecosystems and biodiversity. This awareness leads to the need to also make **economic growth increasingly sustainable and environmentally friendly.**

**Riello Cleaning Machines strives daily and concretely to become an increasingly sustainable company.** This important change is represented and conveyed by the new GoInGreen symbol in which the pinwheel symbolises the future and conveys a fundamental message: the time has come to take action to ensure a better tomorrow for future generations. Indeed, the company has embarked on a path toward sustainability that will be increasingly enriched by projects related to this theme in the coming years.

## GoInGreen

Sharing Our Sustainable Vision

The company, certified ISO 9001 since 1995 (Quality Management System), strives to ensure safe and healthy workplace and to be a supportive and environmentally responsible organization. Riello Cleaning Machines is also dedicated to constantly reducing energy and water consumption, using less paper and fuel, reducing noise in all its forms, and keeping waste production as low as possible. The entire production process applies the **principles of environmental and social sustainability**: the company has obtained ISO 14001 certification (Environmental Management System Certification) and has started the procedure to obtain SA 8000 certification (Social Accountability) through the certification body CSQ.

This work and investments has brought excellent results, contributing to greater corporate sustainability. Of the many environmentally conscious activities undertaken in recent years, one in particular has required exceptional effort. In fact, the company has achieved an important result: **to introduce the use of recycled plastic in the production of its professional cleaning machines and to make sustainable products without sacrificing the quality that has always distinguished Ghibli products.**

# GREENPRO

designed by **GHIBLI**

**DESIGNED BY GHIBLI, GREEN PRO IS A COMPLETE RANGE OF MACHINES WITH RECYCLED PLASTIC, CAPABLE OF MEETING ALL THE NEEDS OF THE MOST DEMANDING PROFESSIONALS IN THE FIELD.**

A broad and diversified range of machines that demonstrates the company's focus on the needs of its customers. The main goal was to **keep the quality of the products unaltered**, and for this very reason, all the parts made from recycled plastic were subjected to the same stringent stress tests as traditional plastic materials. The amount of recycled plastic used in the production of these machines exceeds 25 percent and, for some components, even reaches the 100 percent.

## THE GREEN PRO RANGE

### VACUUM CLEANERS

Sturdy, efficient and eco-friendly family of Dry and Wet & Dry vacuum cleaners that keeps its legendary reliability intact. Thanks to an innovative molding process, the addition of recycled plastic in no way compromises material properties or component quality.

The entire selection of models is subjected to the most stringent stress tests of the materials that make up the machine body and, more generally, of all plastic structural parts. In particular, the tank, which is the most delicate part as it is subjected to intense stress during suction, **is tested to withstand maximum vacuum for thousands of cycles at different temperatures.** The integrity of all structural parts where recycled plastic is present is carefully checked and certified at the end of the tests.

### SINGLE DISCS

Two single-disc models declined in an environmentally sustainable and green way without sacrificing their signature strength, ergonomics and safety. A selection designed to meet all the needs of industry specialists, thanks to an agile and versatile single disc and a professional ultra-high-speed machine for polishing that, in virtue of the perfect combination of weight, speed and motor power, is able to adapt to any cleaning task.

Both models are subjected to a series of **endurance tests under maximum workload, extreme operating temperature for many hours and several consecutive days.** After testing is completed, the recycled plastic components are carefully examined and subjected to dimensional and structural checks.

### SCRUBBER DRYERS

A wide and complete range of the latest generation walk-behind and ride-on scrubber dryers. Eight models of machines dedicated to cleaning all types of areas, from the smallest ones to large gathering spaces, designed under the banner of sustainability and able to meet all the needs of the most demanding professionals.

The use of recycled plastic in the production of this type of machine represents a significant investment that demonstrates Ghibli's serious commitment to addressing environmental protection issues. As shown by the results of acceptance and **endurance tests during operation and transfer** to which these versions of environmentally sustainable machines are subjected, the entire range of Green Pro scrubber dryers guarantees the same performance as those produced without the use of recycled plastic.

# SUSTAINABLE PRODUCTION PROCESS

The products are designed and manufactured entirely in the production plant located in Italy. To achieve complete control over its production cycle, Riello Cleaning Machines makes most of the components of the machines in-house, and each mold is the result of a meticulous prototyping process.

The policy on the use of raw materials is geared toward encouraging production patterns consistent with Goal 12 - **Ensure sustainable patterns of production and consumption** - as defined by the United Nations 2030 Agenda. A sustainable model that prioritizes: high-quality and durable raw materials, recycled items (e.g., recycled packaging and recycled plastic parts of machines), and recyclability of end-of-life products from a circular economy perspective.

A focus on all stages of the life cycle of a Ghibli machine, from the selection of raw material and component suppliers to the end of the product life cycle.

# SUSTAINABLE PRODUCTION PROCESS

All products comply with the **REACH regulation**, which covers the registration, evaluation, authorization and restriction of chemicals used in the production cycle, and the **RoHS directive**, which was introduced to restrict the use of certain harmful and hazardous substances in electronic components.

## RAW MATERIALS

The recycled polymer used in the production of the Green Pro range is derived from plastic wastes, post-consumer waste (bottles, films, motor vehicle scraps, battery cases, bottles and other containers) and post-industrial waste (from plastic processing plants) that are meticulously checked and certified. After the introduction of recycled plastic in this process, the focus on the production cycle increased even further. Riello Cleaning Machines' main goal, to produce more sustainable machines, was achieved only when it was possible **to guarantee the same quality as the products that make up the standard range**. Numerous tests were carried out to verify and certify that the recycled plastic components of the various machines meet the technical requirements and ensure excellent performance.

All plastics employed are recyclable and are marked to make the type of plastic used instantly recognizable and facilitate their recycling.

Most of the production waste is reprocessed and used to obtain new components and accessories.

## RESPECT FOR THE ENVIRONMENT

through the reduction of virgin plastic use in favor of recycled plastic.

## WASTE REDUCTION

most production waste is reprocessed and used to make new components and accessories.

## GREEN PRO POWER D 12 HE

REF. NO. 15847810501

Efficiency, energy saving and environmental protection are now basic market requirements, regulated by increasingly stringent regulations. Ghibli has responded to these growing requirements in a precise and timely manner, revolutionizing its flagship model under the banner of sustainability and energy efficiency: thus GREEN PRO POWER D 12 HE (High Efficiency) was born. A model unchanged in shape and equipment, but radically revamped that, thanks to the use of recycled plastics for its production and the 650 W suction motor, is the perfect mix of reliability, power and optimal energy consumption.

## GREEN PRO VOYAGER 4

REF. NO. 15597810500

Green Pro Voyager 4 is the eco-friendly version of Ghibli's compact, lightweight and durable back vacuum cleaner that fits comfortably like a backpack, providing great freedom of movement during cleaning operations. With its high power and wide range of filters Green Pro Voyager guarantees excellent performance and maximum filtration, making cleaning operations quick and effective while maintaining a cleaner and healthier environment. The machine, made with recycled plastic, ensures durability and performance on a par with the standard model. The elegant and ergonomic design of this vacuum cleaner offers optimal comfort during prolonged use, reducing physical effort and making work less tiring. Every detail of the machine has been designed with the operator's comfort and convenience in mind. The accessory holders, integrated in the belt and shoulder straps, and the large storage compartment ensure that everything you need is within easy reach.

## GREEN PRO AS 5 NEXT FC / FT

**REF. NO. FC 18457810500**

**REF. NO. FT 18457810560**

Green Pro AS 5 NEXT is the eco-friendly version of Ghibli's dry vacuum cleaner, combining compactness with efficiency.

The head houses a powerful brushless motor, which ensures quiet operation whilst delivering excellent cleaning results. The machine, made from recycled plastic, offers the same durability and performance as the standard model.

The ergonomic and durable handle, practical accessory holders, the supplied bumper strip, the trolley with swivelling front castors and fixed rear wheels, and the 10-metre cable make the Green Pro AS 5 NEXT extremely manoeuvrable and easy to use.

To make the machine even more functional, a dual hose coupling system has been designed to ensure a secure fit whilst working. Furthermore, the release mechanism on the suction inlet allows the hose to be easily disconnected with one hand.

Available in the FT version, with a fabric filter (polyester), and the FC version, with a standard cartridge filter, to ensure the best filtration performance.

# WET & DRY VACUUM CLEANERS

## GREENPRO

### GREEN PRO POWER WD 22 P

REF. NO. 14657810500

Wet/dry vacuum cleaner made of recycled plastic material equipped with a new generation motor, the perfect combination of sustainability, high efficiency and power. This model is equipped with the innovative UFS (Ultra FilteRing System) filtering system, which, thanks to the special polypropylene spacer ring, allows the cartridge filter (class M) to remain installed at all times, ensuring optimal suction performance and maximum protection for the motor (even in case of incorrect use by the operator). UFS is also practical: cleaning and maintenance of the floating system, which is independent from the motor head and attached directly to the ring, is immediate, simple and intuitive. Equipped with accessory housings and exhaust air filter. Optional paper, nylon, fleece and HEPA cartridge filters.

# SINGLE DISC AND BURNISHER GREENPRO

## GREEN PRO SB 143 L10

REF. NO. 00-183EL-GH-70

Agile and versatile single disc machine with a diameter of 430 mm that, thanks to its effective motor-weight-speed combination, is suitable for any cleaning and restoration task. Eco-friendly model made of regenerated plastic material subjected to stringent strength tests to ensure the same quality and reliability as the standard model. Equipped with an heavy-duty induction motor for extra durability and great performances, double protection against unintentional start-up, transmission outfitted with planetary and satellite gearbox, and state-of-the-art handle that perfectly combines ergonomics, strength, safety and innovative design.

# WALK BEHIND SCRUBBER DRYERS **GREENPRO**

## **GREEN PRO ROLLY NRG 7 1/2 M 33 BC 10 AH**

**REF. NO. 13.5075.70**

GREEN PRO ROLLY NRG 7 1/2 M 33 is the new compact scrubber-dryer in the Rolly series, more powerful and reliable than ever for top cleaning results! NRG as energy, power, but also innovation: a system of integrated technical solutions to meet the needs of the most demanding cleaning professionals. High-performance model made of regenerated and recyclable plastic material, agile in tight spaces where no one can get to, thanks to its 7,5-liter capacity and ultra-compact size, patented special handle and pivoting rear wheels. The latest generation lithium batteries, enclosed in a practical case, ensure high running time, reliability and performances. Thanks to the cylindrical brush deck with three different down pressure modes, and the special alternating twin squeegee system (patented), GREEN PRO ROLLY NRG 7 1/2 provides excellent drying results while keeping consumption limited and optimized. Low-noise machine (only 54 dbA in silent mode), perfect for day cleaning and working in "sensitive" areas such as hospitals, nursing homes and schools. A model that, thanks to a practical and intuitive control panel that allows the operator to better manage its functions and colored levers/knobs that help the operator in the daily operation of the machine, needs no training and can be used by everyone. Quick and easy ordinary maintenance.

## **GREEN PRO ROYAL 15 M 38 BC LITHIUM**

**REF. NO. 13.0050.70**

Ghibli, increasingly focused on the environment and more and more convinced of the importance of reusing materials, has decided to create a green version also for Royal 15, the new walk-behind scrubber dryer that is an important benchmark in this segment. Thus GREEN PRO Royal 15 M 38 BC Lithium was born, a machine made of regenerated plastic material that guarantees the same quality and reliability as the standard model. The use of the machine is simple and facilitated by the practical and intuitive control panel that allows control of its main functions. The ECO SYSTEM program reduces consumption and eliminates waste while maintaining the best cleaning performance with the utmost respect for the environment. The low noise level, guaranteed by the silent mode function, makes Royal to be perfect for day cleaning in "sensitive" environments (hospitals, nursing homes, schools).

The sturdy and practical aluminum tiltable handle allows maximum manoeuvrability in tight spaces. The design is also carefully studied in every detail to ensure maximum comfort for the operator: the clean lines defining a compact structure and the use of practical compartments in which to store all protruding parts of the machine (such as hoses and cables) help improve the machine manoeuvrability.

# WALK BEHIND SCRUBBER DRYERS **GREENPRO**

## **GREEN PRO FR 30 D 45 BC TOUCH**

**REF. NO. 13.4183.70**

Ghibli's focus on environmental issues led to the creation of the GREEN PRO FR 30 D 45 BC TOUCH, a new version in recycled plastic material of the well-known FR 30 model, which has always been an important benchmark in its market segment. 30-liter capacity scrubber dryer that, thanks to an innovative integrated solutions system, provides maximum maneuverability and ease of use. The user-friendly, interactive control panel with display allows a quick selection of all major machine functions. The "silent mode" function is ideal for day cleaning and in all environments (hospitals, schools, nursing homes) where being quiet is an essential and qualifying element. The adjustable and extremely compact squeegee (only 65 cm) offers perfect drying results. High speed (up to 4.5 km/h), high productivity and great running time (over 2 hours). The sensor-based TOUCH system provides the operator with maximum flexibility and control while operating the machine.

## **GREEN PRO REXA 50 D 55 BC CHEM**

**REF. NO. 17.5055.70**

GREEN PRO REXA 50 D 55 BC CHEM is the new walk-behind scrubber dryer designed by Ghibli also in an eco-friendly version. Its 50 litre capacity, 530 mm washing track, 750 mm suction width and 2650 m<sup>2</sup>/h productivity make it ideal for use in medium-sized areas, guaranteeing fast and effective results even in the most complex environments to clean. The machine's numerous functions such as Silent Mode, ECO System, and Brush Release, for automatic brush release, can be operated easily and intuitively via the practical control panel with integrated display. The ergonomic handle with Touch System gives the operator maximum flexibility and control while working. The LED front light allows the machine to be used even in poorly lit environments. A perfect mix of sustainability, efficiency and power, the Green Pro REXA 50, although produced using regenerated plastic material, offers the same robustness and reliability that have always distinguished Ghibli machines.

# RIDE-ON SCRUBBER DRYERS **GREENPRO**

## **GREEN PRO RUSH 65 RD 55 BC**

**REF. NO. 13.0665.70**

GREEN PRO RUSH 65 RD 55 BC is the new ride-on scrubber dryer designed by Ghibli also in eco-friendly version. Extremely compact and maneuverable, this scrubber dryer made of recycled plastic can move nimbly even with obstacles and in congested spaces. The numerous functions of the GREEN PRO RUSH 65 are managed by the operator in a simple and intuitive way thanks to the practical control panel with display integrated directly into the steering wheel of the machine.

Characterised by the same sturdiness and reliability as the standard model, GREEN PRO RUSH 65 guarantees excellent cleaning and drying results.

## **GREEN PRO RACER R 85 FD 65 BC**

**REF. NO. 13.0675.70**

GREEN PRO RACER R 85 FD 65 BC is the ride-on scrubber dryer made of recycled plastic material, ideal for use in medium-sized areas. Compact and extremely maneuverable, GREEN PRO RACER can move effortlessly even in the tightest and most congested spaces, such as supermarket aisles and checkouts, avoiding obstacles quickly and effectively.

The retractable brush head, which can adapt perfectly to any obstacle, makes Racer unparalleled in "close-to-wall" cleaning. The aluminum squeegee, with natural rubber blades supplied as standard, ensures the best drying results on all kinds of surfaces and, in the event of accidental bumps, is able to automatically move and retract under the machine structure ensuring maximum safety and ease of action. The ECO SYSTEM program reduces consumption and eliminates waste while maintaining the best cleaning performance and respecting the environment.

# RIDE-ON SCRUBBER DRYERS **GREENPRO**

## **GREEN PRO RANGER R 115 FD 85 BC CHEM**

**REF. NO. 13.0815.70**

GREEN PRO RANGER R 115 FD 85 BC CHEM is the ideal ride-on scrubber dryer for use in medium to large areas that combines high performances with ergonomics and maximum operator comfort. Eco-friendly model made of regenerated plastic material that ensures the same quality and reliability as the standard model. Extra ground pressure and detergent action (Chemical mixing system) ensure excellent cleaning results, and the sturdy aluminum head, which can fit perfectly into any obstacle, makes Ranger unrivaled in “close-to-wall” cleaning. The practical and intuitive control panel allows monitoring and management of all machine functions. The ECO SYSTEM program reduces consumption and eliminates waste while maintaining the best cleaning performance with maximum respect for the environment. Ranger is easy to use, in fact it requires no training, and even daily maintenance operations are quick and easy.

## **GREEN PRO RUNNER R 150 FD 100 BC CHEM**

**REF. NO. 13.0710.70**

GREEN PRO RUNNER R 150 FD 100 BC CHEM is the ride-on scrubber dryer made of regenerated plastic that, with its wide cleaning width (1000 mm) and a productivity of about 6000 m<sup>2</sup>/h, is the ideal solution for cleaning large areas. Excellent cleaning performances guaranteed by the wide and “responsive” squeegee, which provides top drying results on all types of surface, the down pressure adjustment system (three levels up to 101 kg maximum pressure) and the detergent action (Chemical mixing system). GREEN PRO RUNNER is designed to ensure the maximum in terms of efficiency and comfort to the operator: all the main functions of the machine are manageable from the practical and intuitive control panel; the easy accessibility to the machine, combined with excellent visibility, ensures convenience and practicality even for particularly long and difficult work sessions. The ECO program makes it possible to optimize consumption, minimizing it while still providing the best cleaning performance.
