

Wet & Dry vacuum cleaners

Wet/dry vacuum cleaners with powerful and high efficiency New Generation motors. Model equipped with the Ultra FilterRing System (UFS) that, thanks to its special polypropylene spacer ring, allows to keep the cartridge filter (M filtration class) always installed guaranteeing best suction performances and maximum motor protection (even in case of incorrect use by the operator). UFS is also a practical solution: the floating system is independent from the motor head and fixed directly to the ring, making cleaning and maintenance quick, simple and intuitive. The I version is equipped with stainless steel container. Paper filter bag, fleece filter, nylon filter and Hepa cartridge filter in option. Accessories holder and exhaust air filters make them very useful and universal for many different applications.
