## Ride-on scrubber dryers RUSH SERIES

Rush 65 RD 55 is the ride-on scrubber dryer ideal for medium sized areas. Compact and extremely maneuverable, with 65 liters tank capacity, 55 cm cleaning width and 75 cm squeegee width, Rush can move smoothly even in tight and congested spaces, cleaning quickly and effectively. With its extra down pressure and a squeegee that ensures effective drying on all surfaces, Rush is the ideal solution for thorough and effective cleaning on all types of surfaces. The practical and intuitive control panel, integrated into the steering wheel, allows the user to control and manage all functions of the machine:

- **READY TO GO:** immediately ready to work! All the machine's main functions can be activated and adjusted simply by pressing a button;
  - **ECO SYSTEM:** the program that reduces consumption and eliminates waste, while maintaining the best cleaning performance and respecting the environment;
  - **SILENT MODE:** the function that reduces the machine's noise level, making it ideal for daily cleaning in sensitive environments such as hospitals, nursing homes and schools.
- Thanks to this, and also to the new automatic brush coupling/uncoupling function, Rush 65 is extremely user-friendly and requires no training, allowing even less experienced operators to use this professional scrubber dryer with ease. Available in three versions, one basic and two full package including batteries and charger, it guarantees a running time of approximately 3½ hours in the BC version and over 3 hours in the BC Lithium version.

The Lithium-Ion batteries have a longer service life and lower maintenance than conventional batteries. They can be recharged at any time, even only partially during short breaks in use, without being damaged.
