

Steam generators - Pest control

S-Team Debugger is the steam generator specifically designed for fast, effective and environmentally friendly pest control, especially for bed bugs. The temperature required to eliminate these pests is 156°C. The 1200W superheater enables this machine to produce dry steam up to 220°C, which can penetrate mattresses, fabrics and textile surfaces without wetting them, eliminating both bed bugs and their eggs. The boiler, with its 2-litre capacity and 2000 W output, allows an operating pressure of 5 bar. Simple, fast and without the use of insecticides or chemicals, S-Team Debugger is the perfect solution for pest control and sanitisation. Ideal for hotels, residences, buses, trains, ships, planes, cinemas and theatres.
